Speed Control	Hose Length	Overheating Protection	Net Weight	Housing
Variable Speed	2.4 m	Thermal	5.9 kg	Durable ABS+PC

The B-27 Professional Double Motor Force Dryer is the most powerful dryer you will ever use and was designed to be extremely quiet, lightweight and powerful. With a powerful 6 HP double motor this dryer will dry the thickest coat reducing drying time and increasing income. Unlike other double motor dryers, the B-27 is remarkably quiet, protecting against hearing loss and animal trauma. The variable control switch allows for precise airflow to dry small or large breeds with short or long hair. A highly balanced motor and improved carbon brush design creates at least 40% less noise and increases the motor life of the dryer. It is also made with durable ABS plastics and comes complete with 3 styling nozzles. The protective 3-filter system keeps hair out of the motor keeping your dryer running efficiently. When you need a high powered dryer that can take on any job, the XPOWER B-27 is ideal!

Features:

- Remarkably QUIET & LIGHTWEIGHT
- Powerful dual motor 2500W
- Variable speed settings
- High impact and rugged ABS+PC housing
- Easy-to-change and washable filters
- 2.4m heavy duty flexible PU hose
